Perillo Tours has launched a mobile app designed to support travelers throughout their journey on the company's escorted tour itineraries. The app is now available for iOS and Android devices.

The tour operator has integrated several features into the platform to serve guests before, during and after their travels. While touring, guests can access daily itineraries specific to their trip, share photographs and participate in group chats with fellow travelers and their tour director. The app also allows direct messaging with tour directors and delivers real-time alerts regarding itinerary modifications or additions.

Payment processing for existing bookings is also available through the app. Prospective travelers can browse escorted itineraries, check current availability and complete bookings directly through the platform.

“Travel is all about feeling connected to the places you go and the people you share the journey with,” said Steve Perillo, third-generation owner of Perillo Tours. “Our new app keeps our guests connected every step of the way.”

The app currently supports all 2025 escorted tours to Italy, Greece, Spain, Portugal and Hawaii. Users can also view shared photographs from previous and current guests through the platform.

Travel advisors and clients can now book 2026 departure dates for several Italian itineraries through the app, including the 15-day “Italy North Classic Tour,” 10-day “Marco Polo Tour,” 12-day “North Continental Tour,” nine-day “Rome and Amalfi Coast Experience Tour” and 10-day “Vesuvius Tour.”

The app can be downloaded through the Apple App Store and Google Play Store.
